Career Objective:

As a frontend developer with extensive experience in HTML, CSS, SASS, Bootstrap, JavaScript, ES6, React JS, React Hooks, Redux, React Router, Axios, Next js, Ant design, Material UI, Git, Typescript, Angular and Figma I'm seeking to leverage my skills and expertise to develop innovative and user-friendly web applications.

Core Competencies:

- Proficient at creating responsive and accessible web applications using HTML, CSS, SASS, and Bootstrap.
- Proficient at modern JavaScript frameworks and libraries such as React JS, React Hooks, Redux, React Router, Material UI, Ant Design, Typescript and Angular.
- Proficient in using Git for version control and collaborating with other developers using Agile methodologies and tools such as Jira.
- Experienced in using Adobe XD, Figma.
- Knowledgeable in testing frameworks such as Jest to write automated tests for code quality and maintainability.
- Knowledgeable in working with Formik, React Native, and Next Js to develop dynamic and engaging web applications.
- Knowledgeable in working with Node.js, Express.js, Restful API, JWT, Mongoose, MVC.

With these competencies, I am confident that I can contribute to your team and help develop high-quality web applications that meet the needs of your clients and users.

Professional Experience:

Job Title: Junior Frontend Developer at Eat Now   (March 2023 - Present)

Now Working on **Reservation panel project**, which is a dashboard for mobile company customers. This project coded with **React Native, Typescript.**

Job Duties:

- Add new Features, Debug & refactor the **User App Ordering** project that coded with the **React js, Typescript, Redux Toolkit, and React Router.**
- Collaborated with the frontend team to identify areas of improvement in the existing codebase and implemented solutions using best practices and design patterns.
- Worked closely with the UI/UX team to ensure the best user experience for customers using **Figma**.
- Developed new features and enhancements as per the project requirements, while ensuring that the code is maintainable, scalable, and efficient.
- Conducted code reviews, identified bugs and issues, and fixed them in a timely manner.
- Ensured that the code is compatible across different browsers and devices.
- Participated in team meetings and discussions, providing input and suggestions to improve the project's quality and efficiency.
- Utilized agile methodologies and tools such as Jira to manage the project and communicate progress with the team and stakeholders.
- Debug & refactor the **Admin Panel** project that coded with the **React Native** based on **Figma.**
